## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Yabuki et al.

Yabuki et al discloses a golf ball comprising a solid center composed of an inner center formed from a vulcanized molded rubber composition containing an oily substance and a center outer layer formed from oil-resistant substance to prevent the oily substance from bleeding. A thread rubber layer is adjacent to the solid center and a cover is formed over the thread rubber layer (abstract). The inner center has a diameter between 24 and 33 mm and the solid center has a diameter between <sup>23</sup>25 and <sup>36</sup>34 mm (col 4, line-33, col 3, line 47). The outer center layer is made from a thermoplastic resin as the main ingredient (col 3, lines 30-40). The cover has a Shore D hardness from 40 to 60 (col 7, line 49) and thickness of 1 to 3 <sup>4 (col 8, line 5)</sup> mm. The hardness values and deformation values of the inner and outer core layers are inherent features of the prior art since the material content is identical to the Applicant's.
